

Project Design Phase – I
Problem –Solution Fit

Date	16.10.2022
Team ID	PNT2022TMID17255
Project Name	Real-Time Communication System Powered by AI for Specially Abled
Maximum Marks	2 Marks

1.CUSTOMER SEGMENT	6.CUSTOMER CONDTRAINS	5.AVAILABLE SOLUTIONS
Who is your customer?	What constrains prevent your customers from taking action or limit their choices of solution?	Which solution are available to the customer when they face the problem or need to get the job done? What pro & cons do these solution have?
<p>Deaf people who eager to learn.</p> <p>Dumb (Mute) people who wants to expression their thought.</p> <p>Parents of deafmute kids.</p> <p>Children of disabled parents.</p>	<p>Network issues may delay to access the feature</p> <p>Improper sign language will lead the people to misunderstood.</p>	<p>Sign to alphabet conversation</p> <p>Word conversation in multilanguage.</p> <p>Train common word and phrases</p> <p>Pros:</p> <p>Convert the sign into voice with emotion</p> <p>Cons:</p> <p>During sign to text conversation there may be an error.</p> <p>There may be chance of misunderstanding word in voice to text conversation.</p>
2. JOBS-TO-BE DONE/PROBLEMS	6.PROBLEMROOT CAUSE What is the real reason that this problem exists?	7.BEHAVIOUR What does your customer do to address

<p>Which jobs-to-be done do you address or your customers?</p> <p>No need of the translator for communication between deafmute people and normal people.</p> <p>Reduce the time to express their thoughts.</p> <p>Reduce cost used for translator.</p>	<p>What is back story behind the need to do this job?</p> <p>Deaf-mute is a birth disorder.</p> <p>Sometimes it occurs due to aging factor and accidents.</p> <p>Normal people are not so patient to understand deaf-mute people thoughts.</p>	<p>the problem and get the job done?</p> <p>Taking the hand gesture image with good quality and uploading it for conversion.</p> <p>Make use of text to voice conversion option while communicating with others.</p>

<p>3. TRIGGERS</p> <p>What triggers customers to act?</p> <p>Customer doesn't need human translator to communicate with normal people.</p> <p>Instant result for the conversion of sign language to human understandable language.</p> <p>Interactive sessions.</p> <p>4. EMOTIONS: BEFORE/AFTER</p>	<p>10. YOUR SOLUTION</p> <p>If you are working on an existing business write down your current solution first fill in the canvas and check how much it fits reality</p> <p>Accurate conversion will be available Interactive and user friendly solution to make it accessible Elimination of human error and fast functionality Provide common signs, including those for letters, numbers, and everyday words and phrases.</p>	<p>8. CHANNEL OF BEHAVIOR</p> <p>8.1 ONLINE</p> <p>What kind of actions do customers take online?</p> <ul style="list-style-type: none"> ☑ Accessing required conversions using application. ☑ Uploading the image of hand sign. ☑ Quick access of AI based algorithm. <p>8.2 OFFLINE</p>
---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

How do customers feel
when they face a problem
before and afterwards?

BEFORE:

Feeling
DEPRESSED
unable express thoughts
feel when

Feeling
FRUSTRATED
REGRET

people speak and
Parents feeling while
able to
recognize
disabled kids.

AFTER:

HEARTED
CONFIDENT 't teach their

as
thoughts. others can
el
CONFIDENT and

ASSURED

in share
their

What kind of actions
do customers take offline?

Taking the hand
sign picture
properly without
any blur.

Parents make kids
to practice in
this
application.

Children of
elderly disabled
people helps to
teach their
parents.

Parents, relatives and
friends of disabled people
are **HAPPY**
