Project Phase - I

Solution Architecture

Date	16.10.2022
Team ID	PNT2022TMID17255
Project Name	Real -Time Communication System Powered by AI for Specially abled
Maximum Mark	4 Marks

Solution Architecture:

Solution architecture is a complex process - with many sub-processes - that bridges the gap between business problems and technology solutions. Its goals are to:

- ✞ Find the best tech solution to solve existing business problems.
- ✞ Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.
- ✞ Define features, development phases, and solution requirements.
- ✞ Provide specifications according to which the solution is defined, managed, and delivered. Solution Architecture Diagram:

**Solution Architecture Design:**
